EXPERIENCE

Part Time Android Dev at NBS.co.id (2019 – 2021)

Adept at bringing all team members together to develop various kinds of Android Apps. In developing android apps I use the MVVM Design Pattern, Room DB, Retrofit, and Kotlin/Java language. In developing the application I do the following things starting from analyzing the existing UI/UX, creating a layout, coding the logic, then consuming API for dynamic data (post, get, update, etc.) on the application.

Android Class (in Campus) Tutor (2019-2020)

Teach students to develop Android applications from basic to advanced. Starting from how to install android studio, create layouts using XML, write code using Kotlin, Room DB Implementation, API implementation using Retrofit, and implement MVVM Pattern for data consumption.

Developer Student Clubs Leader UIN JKT (2019)

Google Developer Student Clubs are university based community groups for students interested in Google developer technologies. By joining a GDSC, students grow their knowledge in a peer-to-peer learning environment and build solutions for local businesses and their community.
